Garage Band
Premier

MAKING

Prototyping
model making
laser cutting
3D printing
basic sewing
sketching
storyboarding

PRODUCT DEVELOPMENT

I am well versed in the design process of both soft and hard goods with an emphasis on outdoor products, gear and equipment. I have the knowledge and ability to take an idea from concept to reality through sketching, prototyping, user and customer research to final models, renders, and manufacturing strategies with emphasis on ecological practices.

CREATIVE THINKING

Integrating both my design experience as well as my personal interest to my way of thinking, I have developed a creative mind capable of identifying problems and coming up with solutions to them in new and innovative ways.

LEADERSHIP AND PEOPLE SKILLS

My investment in projects not only drives me to succeed but also allows me to motivate people around me to do the same through communication and personal action, working together to reach the goal.

EDUCATION

Art Center College of Design 2021 – 2024
Bachelor of Science in Product Design

AWARDS AND RECOGNITIONS

ArtCenter UG Scholarship 2021 – 2024
Provost List Spring 2021
Provost List Summer 2022

INTERESTS

I have a wide range of interests and skills in many disciplines, including music and basketball (captain of the team) but the most important to me are the ones related to nature and outdoor sports such as whitewater kayaking, rock climbing, alpinism, and hiking.
